JANUARY.

Low the woods

Bow their hoar head : and ere the languid sun,
Faint from the west, emits his evening ray,
Earth's universal face, deep hid and still,
Is one wild dazzling waste, that buries wide,
The works of man.

FEBRUARY.

The keener tempests rise ; and fuming dun,
From all the livid east, or piercing north,
Thick clouds ascend ; in whose capacious womb
Vapoury deluge lies, to snow congealed.
Heavy they roll their fleecy world along ;
And the sky saddens with the gather'd storm.

JUNE.

Now have young April and the blue-eyed May
Vanish'd awhile, and lo! the glorious June
(While nature ripens in his burning noon)
Comes like a young inheritor; and gay,
Although his parent months have passed away;
But his green crown shall wither, and the tune
That usher'd in his birth be silent soon.

I stood upon the hills, when heaven's wide arch
Was glorious with the sun's returning march,

The clouds were far beneath me; bathed in light,
They gather'd mid-day round the wooded height.

But see the fading, many-color'd woods !
Shade deepening over shade, the country round
Embrown'd ; a crowded umbrage, dusk and dun,
Of every hue, from wan declining green
To sooty dark,—these now the lonesome Muse,
Low whispering, lead into their leaf-strown walks
And give the season in its latest view.

Explanation of the Articles in the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

MOON'S PHASES.—This Table gives the times for the two meridians when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this Table are given the times at which twilight begins in the morning and ends in the evening, &c., the times when the Sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	-5' 27"	-3' 43"	-1' 55"	0' 00"	+ 2' 1"	+ 4' 8"	+ 6' 22"	+ 8' 44"	+ 11' 14"
2nd Correction for each minute of latitude	+ 1".7	+ 1".8	+ 1".9	+ 2".0	+ 2".1	+ 2".2	+ 2".4	+ 2".5	+ 2".6

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

Thus for latitude 43° 20'...1st correction = - 3' 43"	2nd correction + 1.8 × 20 = + 0' 36"
" " 47° 40'... " = + 4' 8"	" " + 2.2 × 40 = + 1' 28"
" " 45° 10'... " = + 0' 0"	" " + 2.0 × 10 = + 0' 20"

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto and Quebec.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto and Quebec.

The column, SUN ON MERIDIAN, gives the time that a watch should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto, noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian in the morning from April 11 to October 10. It passes the meridian twice on October 10; and in the afternoon during the rest of the year.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The four last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

THE YEAR.

The length of the year is strictly expressed by the space of time required for the revolution of the earth round the sun—namely, 365 days, 5 hours, 48 minutes, 49 seconds, and 7 tenths of a second, for to such a nicety has this time been ascertained. But for convenience in reckoning, it has been found necessary to make the year terminate with 4 day instead of a fraction of one, lumping the fractions together so as to make up a day among themselves. About forty-five years before Christ, Julius Cæsar, having, by the help of Sosigenes, an Alexandrian philosopher, come to a tolerably clear understanding of the length of the year, decreed that every fourth year should be held to consist of 366 days, for the purpose of absorbing the odd hours. The arrangement he dictated was a rather clumsy one. A day in February, the sixth before the calends of March (*sextilis*), was to be repeated in that fourth year; and each fourth year was thus to be *bissex-tile*. It was as if we were to reckon the 23rd of February twice over. Seeing that, in reality, a day every fourth year is too much by 11 minutes, 10 seconds, and 3 tenths of a second, it inevitably followed that the beginning of the year moved onward ahead of the point at which it was in the days of Cæsar; in other words, the natural time fell behind the reckoning. From the time of the Council of Nice, in 325, when the vernal equinox fell correctly on the 21st of March, Pope Gregory found in 1582 that there had been an over-reckoning to the extent of ten days, and

now the vernal equinox fell on the 11th of March. To correct the past error, he decreed that the 5th of October that year should be reckoned as the 15th, and, to keep the year right in future, the overplus being 18 hours, 37 minutes and 10 seconds in a century, he ordered that every centennial year that could not be divided by 4 (1700, 1800, 1900, 2100, 2200, &c.) should *not* be bissextile, as it otherwise would be; thus, in short, dropping the extra day three times every four hundred years. The Gregorian style, as it was called, readily obtained sway in Catholic, but not in Protestant countries. It was not adopted in Britain till the year 1752, by which time the discrepancy between the Julian and Gregorian periods amounted to eleven days. An Act of Parliament was passed, dictating that the 3rd of September that year should be reckoned the 14th, and that three of every four of the centennial years should, as in Pope Gregory's arrangement, not be bissextile or leap-years. It has consequently arisen—1800 not having been a leap-year—that the new and old styles now differ by twelve days, our first of January being equivalent to the 13th old style. In Russia alone, of all Christian countries, is the old style still retained; wherefore it becomes necessary for one writing in that country to any

foreign correspondent, to set down his date thus: ^{12th} 24th March, or ^{26th September} 7th October; or, it may be, ^{26th December, 1870} 9th January, 1871.

* The indicated decrease of the population of the City of St. John is attributable to the great fire which occurred in the year 1877, when half of the city was laid in ashes. Great numbers were thereby driven into the surrounding districts, and many whose business and social ties were thus severed did not return to the city.

FISHERY AND GAME LAWS IN ONTARIO AND QUEBEC

CLOSE SEASON

Each person guilty of violating these regulations is liable to fine and costs, or in default of payment is subject to imprisonment.

No person shall, during such prohibited times, fish for, catch, kill, buy, sell, or have in possession any of the kinds of Fish or Game mentioned above.

If such rate be not fully prepaid by the stamps affixed, the packet to be rated with the deficient postage and a fine of 5 cents in addition.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered on affixing thereto a registration stamp of the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or Samples must be sent in covers open at the ends so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen or such like material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The packet may bear on the outside the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; inside, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices, may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

UNITED STATES.

Patterns and Samples of Merchandise, posted for places in the United States, will continue to be subject to the special rate of 10 cents each, prepaid by postage stamps, and must not exceed 8 oz. in weight.

UNITED KINGDOM.

Patterns and Samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 8 oz. in weight, and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz.

The fluctuations in the expenses of management, and in the average cost of each transaction,—where not explained by variations in the amount of business and the number of transactions,—are mainly attributable to payments in one year for services not wholly chargeable to that year.

The total cost of maintaining the Post Office Savings Bank, including interest allowed to depositors and all expenses of management, averages about 4½ per cent. on the Savings Bank Balance in the hands of the Government.

Eight per cent. of the transactions during the past year, or one in every 13 deposits and withdrawals, were by depositors availing themselves of their privilege to deposit and withdraw at pleasure at any Post Office Savings Bank, without change of Pass Book. The transactions of this character numbered 10,140 during the year.

The business of 1882, as compared with that of 1881, shows an increase of 25,633 deposits, and an increase in the amount deposited of \$2,260,947.

The number of depositors' accounts advanced from 39,605 in 1881 to 51,403 in 1882, an increase of 11,858, and the balance due to depositors increased by \$3,965,434 76.

The total interest allowed to depositors and added to their deposits during 14 years' business amounted, on 30th June, 1882, to \$1,683,111 79.

COPYRIGHTS IN CANADA.

Copyrights may be secured by any person domiciled in Canada, or any part of the British possessions, or being a citizen of any country having an International Copyright Treaty with the United Kingdom, who is the author of any book, map, chart, musical composition, or of any original painting, drawing, design, &c., upon the following conditions:—The books, maps, &c., must be published in Canada; and in the case of a work of art, it must be produced in Canada, either prior to or simultaneously with its production elsewhere. Two copies of books, maps, &c., must be sent to the Minister of Agriculture; and in the case of paintings, statuary, &c., a written description of the same must be furnished. The fee for registering a Copyright is one dollar, and

it runs for twenty-eight years. It may also be renewed for a further term of 14 years upon the same conditions.

An Interim Copyright may be obtained, pending the publication of any literary, scientific or artistic work, by depositing in the Office of the Minister of Agriculture a copy of the title, or a description of such work. The Interim Copyright runs for one month, and the fee is fifty cents. The work, however, must be published inside the time specified, or the author incurs a penalty not exceeding one hundred dollars.

The penalty for infringing a Copyright is the forfeiture of every copy of the work to the owner of the Copyright, and the payment of a fine of not less than ten cents, nor more than one dollar, for every copy found in possession.

THE CLERGY OF CANADA,

POST OFFICE SAVINGS BANK, CANADA.

Post Office Savings Banks in Ontario and Quebec are open daily for the receipt and repayment of deposits, during the ordinary hours of Post Office business.

The direct security of the Dominion is given by the Statute for all deposits made.

Any person may have a deposit account, and may deposit yearly any number of dollars, from \$1 up to \$300, or more with the permission of the Postmaster-General.

Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such woman.

Deposits for children under 10 yrs of age may be made—

Firstly—By a parent or friend as trustee for the child, in which case the deposits can be withdrawn by the trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both trustee and child.

Secondly—In the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

A depositor in any of the Savings Bank Post Offices may continue his deposits at any other of such offices, without notice or change of Pass Book, and can withdraw money at that Savings Bank Office which is most convenient to him.

Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums

paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

Each depositor's account is kept in the Postmaster-General's office, in Ottawa, and in addition to the Postmaster's receipt in the Pass Book a direct acknowledgment from the Postmaster-General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster-General, by letter, being careful to give his address, and, if necessary, write again, because the Postmaster's receipt or entry in the Pass Book is not sufficient without the further receipt for the money from Ottawa.

Every depositor must send his book once a year, viz., on the anniversary of his first deposit, for comparison with the books of the Department, and for insertion of interest. The book will be returned to him by first mail. At no other time should a depositor suffer his book to be out of his own possession.

When a depositor wishes to withdraw money, he can do so by applying to the Postmaster-General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

MANUFACTURING INDUSTRIES OF NATIONS.

The march of civilisation has been, in the present century, to some degree identified with the progress of manufactures. The industries that now occupy 12,500,000 workmen in Europe were in their infancy at the period of Waterloo, and since that time the countries most advanced in manufactures have been the most prosperous. The United States, if the manufacture of flour is included, stands first of all countries in the world. The annual product is nearly 4 billion dollars, and it is not improbable that nearly 5,000,000 operatives are employed in its various industries. The product, per operative, owing to the greater intelligence and skill of American artisans, is higher in the United States—namely, \$1,560 for each; in the United Kingdom, \$1,120; in France, \$1,100; in Germany, \$515; in Russia, \$530; in Austria, \$600; in the Low Countries, \$500; in Spain and Portugal, \$595; in Italy, \$540; in Scandinavia, \$450; in the Colonies, \$500 for each. The textile manufacturers employ 3,500,000 workmen. England, of course, stands first in this regard; but the United States holds the second position, and, as estimated, produced in 1880 a combined product of cotton and woollen goods valued at \$420,000,000; the total product for the world being \$2,435,000,000. The United States manufactures about one-sixth of the entire textile product of the world. More than two-thirds of the world's cotton crop is grown in the United States, the product, according to the census of 1880, being 5,730,968 bales. The world's product of silk is estimated at \$400,000,000, and something over 500,000 operatives are employed in this industry. France leads with 170,000 operatives and a product of \$340,000,000. According to the report of Special Census Agent Wyckoff, 34,440 persons are employed in the United States in the manufacture of silk, and the total value of the product is \$34,410,463, thus producing about 8 per cent. of the total production of the world. In 1850 the iron-producing countries of the world manufactured about \$1,360,000 tons of iron, of which but a little over 500,000 tons was produced by the United States. The construction of railways and the building of iron vessels have caused the production of iron to quadruple within thirty years, and to-day these countries produce upwards of 18,000,000 tons, 7,265,140 tons of which are produced in the United States. In 1880 the United States produced 741,475 tons of Bessemer steel rails, while the total product of the United Kingdom was only 732,910 tons. The United States to-day makes one-fourth of the world's iron and one-fifth of its steel. The total production of the iron and steel works of the United States in the Census year 1880 was 7,265,140 tons; in 1870 it was 3,655,215 tons; increase, 3,609,925 tons, or 98 76 per cent.

COLLEGIATE INSTITUTES AND HIGH SCHOOLS.—Each of the High Schools, (which form the intermediate link between the Public Schools and the Universities), is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Council, except where there is only one school in the County. The head master must be a graduate of a British or Colonial University unless certified and appointed before 18th September 1865. Besides fees, local rates to the extent of half the government grant must be raised for the master's salary. The grant is payable to those Schools only which attain a certain standard, and is based on the average attendance of pupils in the prescribed studies. High Schools which have an average attendance of 60 male classical pupils, may be made Collegiate Institutes, and receive \$750 additional grant. An extra grant is provided for masters taking certain meteorological observations and giving scientific knowledge preparatory to military instruction. Pupils attending these schools are prepared for Matriculation in the Universities. There were 16 High Schools and 16 Collegiate Institutes, with 13,000 pupils, in Ontario, in 1881. James A. THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By Revised Statutes of Ontario, c. 138, the Benchers theretofore appointed, from time to time, by their own body, are made, exclusive of *ex-officio* members, elective by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elective*, thirty in number, being chosen by the ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

In respect to elections for the Local Legislature of Ontario, the Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually in Michaelmas Term and severally select, by a majority of votes, a Judge of their respective Courts to be placed on the rota for the trial of election petitions. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed \$200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to \$400; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con., or seduction. SPECIAL TO THE TRADE.

Having every facility afforded us for purchasing direct from the makers, which Cash Payments can command: and having also a permanent representative in the British and Foreign Markets, together with our usual staff of departmental buyers semi-annually visiting the chief centres of manufacture, enables us not only to purchase on the most favourable terms, but to keep our stock well up with the latest Choice Novelties as they appear, another important feature of our business is that we have completed arrangements by which we entirely control several LINES and PATTERNS for the Dominion.

The extent, variety and completeness of our stock during the regular, as well as the assorting season, give purchasers the advantage of supplementing their stock with the most seasonable goods as required.

Letter orders or such to our Travellers or a personal visit will oblige

BANKING AND INSURANCE.

The paid-up capital of the three largest Banks in Canada is \$22,565,866. Over Twelve Million Dollars of this capital is kept employed, not in Canada, but at their U. S. branches, earning large dividends for their Canadian stockholders.

THE ETNA LIFE INSURANCE COMPANY offers to the business men of Canada a more direct and more profitable investment for their funds, by means of its convenient and valuable

ENDOWMENT BONDS

running for 10, 15, 20, 25 or 30 years, and in sums of \$500 to \$15,000, and yielding annual cash dividends. These Bonds are issued at various prices, according to the age of the purchaser, and the length of time the Bond is to run. They may be paid for in one sum, or in annual or semi-annual instalments to suit the purchasers' convenience. They are unusually secured, not only by accumulated assets of over \$28,000,000, but by special deposits at Ottawa, and by a most valuable experience of 33 years in selecting the safest and most profitable investments.

At age 41, a payment of \$7.373 will purchase, on a healthy man, an Etna Endowment Bond for \$10,000, payable 10 years from date, or at earlier death, and an annual cash dividend besides. The increase of the \$7.373 to \$10,000, the annual dividends, and the value of the life insurance, have yielded to those living the 10 years through, a return of EIGHT TO NINE PER CENT. AS AN INVESTMENT.

No. 63,784, an Endowment Bond for \$2,000 was issued to E. M. MORPHY, Esq., the well-known jeweller, Yonge street, Toronto, in June, 1869, and paid in 1880. MR. MORPHY'S opinion of the investment is shown by his taking three more ETNA BONDS. Ask him.

No. 64,944, an Endowment Bond of \$4,000, was issued in July, 1869, to C. QUINLAN, Esq., ex-Mayor of Port Hope, and cashed in 1879. Allowing for the 10 years' life insurance received, the balance yielded better than Eight (8) per cent. Compound Interest. When receiving his money, Mr. Quinlan expressed regret that he had not taken \$8,000 or \$10,000 in the first place, and thus saved thousands of dollars lost during the ten years in other investments which then promised better than this. He has re-invested with the ETNA on a liberal scale, and on the same 10-year Endowment Plan.

No. 70,607, an Endowment Bond of \$1,000 was issued to JOHN ROSS, Esq., Merchant, Galt, in 1870 and paid, with profits, in 1880. Mr. Ross' opinion is expressed in the form of two more, taken in 1880 and in 1892.

No. 74,684, an Endowment Bond of \$5,000, was issued to THOS. THOMPSON, Esq., "Mammoth House," Toronto, in June, 1870. He finished his ten payments in 1880 made a careful examination of the subject, and took another \$5,000 on the 10-year plan. He now receives two large cash dividends annually.

No. 82,050, an Endowment Bond of \$4,000, was issued to JOHN HOGG, Esq., Merchant, Guelph, in April, 1871, and settled in March, 1881. As an investment it resulted almost precisely the same as Mr. Quinlan's, and the company has now a still larger interest in Mr. H.'s good health, as well as in that of many of his business friends.

No. 87,957, for \$1,000 was issued to DANIEL ROSE, Publisher, of Hunter, Rose & Co., Toronto, in 1872, and cashed in 1882. His opinion is expressed in double the amount for another 15 years.

No. 89,952, for \$2,500 was issued in 1872 and paid in 1882, to A. T. H. BALL, Esq., Barrister, Galt, whose opinion is expressed in another of same amount, for another ten years.

No. 92,785, for \$5,000 was issued in 1872, and paid in 1882 to JAMES W. GALT, Esq., Wholesale Merchant, Toronto, found a profitable investment, and repeated for another ten years.

The late SAMUEL PETERS, Esq., C.E., of London, Ont., held one of these Endowment Bonds, issued last December, for \$4,000. It cost him only \$443 to leave \$4,000 to his estate.

An additional sum of \$100,000 has just been deposited with the Government at Ottawa, making the ETNA'S total deposit there \$325,000.

Write to the undersigned, Toronto, for further information respecting Endowment Insurance, or see an Agent of the ETNA LIFE.

THE MOST
PERFECT SUBSTITUTE
FOR MOTHER'S MILK.

The Highest Amount of Nourishment in the Most Digestible and Convenient Form.

THE ONLY FOOD SPECIALLY PREPARED FOR INFANTS.

"The Adult CANNOT thrive on the Milk provided for the Infant, while the food adapted for Adults MUST be too strong for Babies."

Abounding in FLESH-FORMING and BONE-FORMING substances, this FOOD perfectly fulfils its object, whereas other so-called Foods, such as Corn Flours, being entirely devoid of nourishing properties, induce a rickety and idiotic condition. It is also carefully freed from the ground husks of the wheat, which cause irritation of the bowels, diarrhoea, &c.

CAUTION.—A Genuine Food should not contain an excess of Sugar, NOR BE TOO PALPABLY SWEET. Such Foods may be palatable, but they are also pernicious. For this reason so called Milk Foods, Condensed Milks, &c. are prejudicial to the health of Infants, from the large proportion of beet sugar they contain, rendering them utterly unlike the article they are supposed to represent, viz., MOTHER'S MILK.

Cigars and Cigarettes, Boxes, 3s. 6s., 15s. Pastilles and Powder (for Non-Smokers' use)—Boxes, 2s. 6d., 5s., 10s. For use as Tobacco—Tins, 2s. 6d., 5s., 10s., 15s.

THE SPECIAL NUTRIMENT—PANCREATIC EMULSION IN CONSUMPTION.

Loss of Weight, Loss of Power to Digest and Assimilate
Food and especially Fat.

"FAT IS ONE OF THE MOST ESSENTIAL ELEMENTS OF HEALTH."

Dr. DOBELL on Loss of Weight, Lung Disease, &c.

PANCREATIC EMULSION of Solid Fat "supplies the system with what it most wants, a large amount of nourishment with the least amount of digestive labour, and in a form most easily assimilated."

PANCREATIC EMULSION has been in extensive use for the last 20 years at the ROYAL HOSPITAL for DISEASES of the CHEST, LONDON, and also at many similar Public Institutions in London and the Country as well as in private practice in all parts of the world.

"From 1843 to 1872, at the ROYAL HOSPITAL alone, I prescribed the Emulsion in more than 6,000 cases. Happily, to my own experience may now be added that of thousands of my professional brethren in different parts of the world, by whom Pancreatic Emulsion and Pancreatine are daily prescribed and from whom I constantly receive testimony of their value."—Dr. DOBELL, Senior Physician, Royal Hospital, &c.

"We have lately seen a young lady who has been taking PANCREATIC EMULSION for months, and while doing so she has been changed from a thin, nervous desponding creature, into a plump, tolerably robust and cheerful woman."—*Dublin Quarterly Journal of Medical Science.*

"Considering how largely PANCREATIC EMULSION is now used in the wasting diseases of adults, it is not surprising that scarcely a week passes but general practitioners relate cases of its success in the wasting of delicate children. Certainly, of all the satisfactory effects of PANCREATIC EMULSION, none equal the almost magical recoveries of some of these children."—*The Practitioner, London.*
